

Character name: Cyberia

About your character:

An unknown woman was found in a wrecked vehicle in a war zone. Her right eye was badly damaged and her left arm was gone. Her husband and children were dead. The medics who saved her life had her transported to a well-equipped medical facility away from the front lines where she was given a basic cybernetic eye and arm.

The medical facility was attacked while the woman was recovering. She broke out of her room in the chaos. As she fled the facility, she grabbed an identifier upgrade for her eye and blaster upgrade for her arm. Alone in an unfamiliar world, the woman took on the name "Cyberia" and fights a war of her own as she seeks to remember who she is, why she was in the war zone, and who destroyed her life.

Skills: Single shot, charge shot, rapid fire, lock on, identify
